Hampton, NH 03843-0778

Dear Mr. Simon:

Thank you for submitting your annual **Method Detection Limit/Limit of Detection** summary, as required by the joint Corps of Engineers/EPA Regional Implementation Manual (RIM). Since May 6, 2006, all laboratories submitting test data to the New England District (NAE) in connection with the Corps of Engineers dredging program must have a Laboratory Quality Assurance Plan on file at NAE that meets the requirements of the RIM. The RIM contains guidance for sampling, testing, and data reporting for dredged material disposal in New England waters.

We have reviewed your **Method Detection Limit/Limit of Detection** summary and determined that it meets the requirements of the RIM. Your company is on the list of labs that have a suitable Laboratory Quality Assurance Plan on file. This list can be found on our website at <http://www.nae.usace.army.mil/Missions/Regulatory/Dredged-Material-Program/>.

Please remember to send Christopher Veinotte updates to your Laboratory Quality Assurance Plan as needed.

Thank you for your cooperation in this matter. If you have any questions, please contact Christopher Veinotte at 978-318-8495 or christopher.l.veinotte@usace.army.mil.

Sincerely,
